MSS® COMPANY PROFILE

MSS Group provides efficient, inexpensive and high-quality solutions for the demands of its customers for cleaning chemicals, equipments, consumables and fabrics. We proudly seal the superior and reliable Turkish product stamp on each product. MSS Group is on the way to become a link of the brand chain in the global market. Europe, America, Central Asia, Arabian Peninsula and Africa are among our target markets and we allocate 60% of our production to import.

As a result of the internal R&D practices, MSS Group develops concentrated, inexpensive, hygienic and environmental friendly products that are harmless to human health by using advanced technologies. Instead of ordinary products we put our quality products into the service of our customers.

Starting with the principle that "The customer wants to hear the solution, not the problem", the MSS Group is side by side its customers as their closest business partner with its training, consultancy and facility services to bring solutions to the problems of professional cleaning companies, hotels, restaurants, schools, and social facilities of public institutions.

MSS Group would like to thank its business partners, who have made considerable contributions to the production, promotion and usage of its products and services and to remind them that achieving the importance and pride of being "the strongest link of the chain" is a team work.

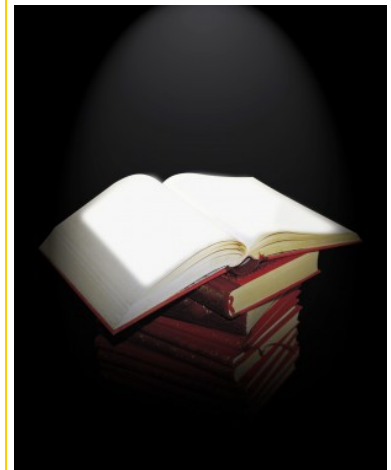

OUR FUNDAMENTAL PRINCIPLES

MSS Group has integrated issues as business strategies, corporate ethics, corporate identity and profitability into its corporate culture and has established its fundamental values. These fundamental values are managed and developed according to the changing conditions. The corporate culture belongs to the employees as well as the business partners.

The corporate culture has been grounded on the individual and corporate past experiences in the light of the fundamental universal values.

The fundamental values that we adopt as the corporate culture:

- ✚ We are respectful to the customs and traditions, and are attached to the national and moral values
- ✚ Our first concern is "human" and "services".
- ✚ As a supplier, we are respectful to the consumer rights.
- ✚ We abstain from activities that will lead to unfair competition and improper gains
- ✚ We abide by the law, pay taxes, follow and perform our rights and duties accurately.
- ✚ We care for the vocational and individual training of our employees and protect their rights.
- ✚ We do not make discrimination on the basis of political opinion, belief, race and gender.
- ✚ We are against all kinds of bribery and corruption.
- ✚ We contribute to the protection of the environment with our products.

OUR VISION

Being an innovative and respectable firm with our quality policy that was developed within the framework of the Total Quality Management (TQM), with our management and production strategies that were developed in the light of the EFQM Excellence Model, and with our products and after-sales services.

Having priority in customer choices in domestic and foreign markets.

Being in a constantly developing family with our customers and suppliers, building a reliable, productive, profitable and result-focused structure and providing its sustainability.

OUR MISSION

The mission of MSS Group is to be modern, reliable, environmental friendly in its specified products and services; to be respectful to the consumer rights; to provide quality products, services and training; to respect the social rights and to respond to the training demands of its employees; to gain the confidence of its customers, suppliers and employees and to increase their reliability constantly in the framework of joint liability; and to become a company that provides an innovative and developing atmosphere.

OUR QUALITY POLICY

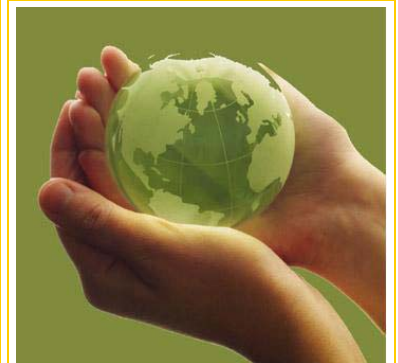

Our company specified in cleaning chemicals and equipments for institutional size, has designated a Quality Policy in order to successfully implement its mission and has developed an organization that is constantly monitored in the light of EFQM Excellence Model.

- ✚ To make a collective effort for building a future-oriented and participatory environment, where employee satisfaction is maintained.
- ✚ To give support to the establishment of a quality-consciousness in every level of the cleaning industry, with priority to the institutions, which are contributing to the production and services of the MSS Group.
- ✚ To adopt the concept of constant quality improvement and to provide sustainability with technological investments for this purpose.
- ✚ To provide our customers with useful and efficient products, and to give high priority to customer satisfaction.
- ✚ To develop the knowledge and skills of our employees, to improve their behaviours.
- ✚ To become a reference company that provides production, supply and services in international standards.
- ✚ To provide all of customers, who are covered by our safety umbrella with our quality products and quality solutions without delay.

OUR ENVIRONMENT, JOB AND FOOD SAFETY POLICY

In order to accomplish its mission, our company that is operating in the production of industrial and institutional size cleaning chemicals and equipments has obtained OHSAS 18001, H.A.C.C.P. and ISO 22000 quality certificates, has determined its policies and established a constantly monitored, ever-learning organization under the light of the EFQM Perfection Model.

- ✚ To use harmless materials in cooperation with our suppliers and to provide the customers with environmental friendly products.
- ✚ To use raw materials that are not harmful to the food safety and to maintain a healthy production environment
- ✚ To give consideration to the health of the employees at work and to give priority to their safety.
- ✚ To comply with the legislation as an institution.
- ✚ To provide constant innovation and development.

MSS® GRUP

Setting its motto as **"The customer does not want to hear the problem, but its solution"**, MSS GROUP is always side by side with its customers as being their closest partner by its education & training services for professional cleaning companies, catering companies, hospitals, hotels, restaurants, food & beverage companies, military organizations, governmental organizations and foundations etc.

By the result of the R&D activities conducted within its own structure, MSS GROUP has avoided commonly known products and has developed technologic, concentrated, economic, hygienic and environment-friendly products, which are presented to its precious customers' use.

WE ARE A STRONG LINK OF THE CHAIN

BUILDING CLEANING AND CARE CHEMICALS

The cleaning and care of your building is the mirror of your business and is indispensable for a successful company.

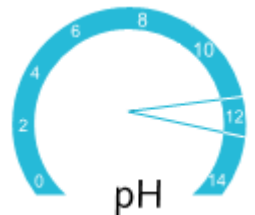

The cleaning of the toilets and the common areas and also the cleaning and the care of offices and the rooms are very important. MSS GROUP carries your whole team to the high hygienic standards with its effective, economic, reliable and environment-friendly products.

HOSPITAL CLEANING AND HYGIEN CHEMICALS

Hospital hygiene requires special applications other than general cleaning, therefore, special applications are needed for disinfecting the areas from microorganisms and preventing the infectants from various sources.

MSS Group had identified the hospital hygiene risks by making researches in most of the hospitals in Turkey and developed different kinds of products in laboratories for every risky department.

MSS Group responds this sensitive need of hygiene with the rich product scale, equipments, training and post-purchase services.

MSS® - MOONCID Forte

Surface Disinfectants

Concentrate Surface Disinfectants Free Formaldehyde Article

- Moonicid Forte versatile disinfectant for disinfection, the combined formulation was developed.
- Formaldehyde, cleaning and disinfectant agent
- All washed or wet surfaces can be deleted, especially in the operating room such as furniture and floors, cleaning and disinfection, infection, high risk areas, the strong suspicion of contamination, intensive care, maternity, ward of infection, disinfection and quarantine, such as periodic cleaning of parts, all the units required in a short time and high-impact used safely.

POST-FIRE CLEANING AND HYGIEN CHEMICALS

Post-Fire cleaning process requires special and extraordinary attention and professional approach to structure and hardware of buildings.

Process must be in a short time at application of post fire cleaning as possible as. It's necessary both environment and human healthy. Surfaces free of soot, furnitures, tools and equipments cleaning, eliminating of soot odor and disinfecting of environment is necessary.

MSS Group produces special cleaning chemicals and disinfects which removes soot stains, burn wastes and heavy scents and supplies to Professional users.

CLEANING MACHINES, EQUIPMENT & CONSUMABLE MATERIALS

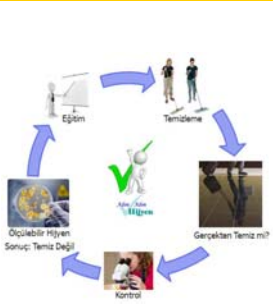

Knowing the importance of machinery for efficient work, MSS Group anticipates the needs of its partners for the mechanical energy equipment park, which is inevitable for cleaning operations. It is the most reliable supplier of Machinery, Equipment, and Consumables for its customers.

By sharing the R&D work with its partners, MSS Group has developed and presented its customers products that are more technological, ergonomic, economic, environment-friendly and suitable for human health and use rather than ordinary equipments and consumables.

MSS® MOP CLEANING SYSTEM

When it comes to hygien of medias, beyond general cleanliness, Spaces must be purified from pathogenic microorganisms. Special applications require to prevent microorganisms that will become infections in a variety of ways. Risk of contuction is very important at fields of public lifes. Mop cleaning system minimised this risk. Many countries apply this system for a long time.

MSS® MEASURABLE HYGIENE SYSTEM

Cleaning is always not enough for becoming healthy media lonely. Looks like very clean hands, surfaces, materials, foods, and also air can not be detected with the naked eyes that purified from pathogenic microorganisms.

Sometimes We may get dirt all materials by conduction if we consider it's clean. Flora of building units and hands's microorganisms densities are different. We may prepare hygien map of space with measurable hygien system and create safety hygienic medias with education activities.

MSS® OZONE TECHNOLOGY SYSTEM

The use of ozone is common at drinking water treatment plants through oxidation and disinfection properties very strongly. The use for disinfection of medias air, food production and storage area, fruits and vegetables, bad odors at sanitary areas is quite safely.

Storage belong food producer institutions and organizations, kitchens public food producer, public transports, hotels, hospitals, schools, nursery, Professional cleaning companies (especially; post-fire cleaning, historical architect cleaning, cleaning moist, bed and carpet disinfection) Professional crpet washing factory and laundries.

P.S.: Detail informations (Product Data Sheet, Material Safety Data Sheet, Quality and Permission documents, Hygien Plan e.t.c.) about your supply products from us are presented to your side by MSS Group Sales and technical support consultant.
