

MSS®-DİONE Rustlime

Acidic Sanitary Stripper

Sanitary
Cleaner

Features

Intensive cleaner, containing acid and leaving a pleasant fresh fragrance, for fast removal of lime residue and dirt which is bound in it. Especially recommended for sanitary areas with high formation of lime due to the degree of water hardness. With disinfection effect according to EN 1040 (undiluted) and EN 1276.

Surfaces become resistant to lime, dirt and water through use of the protective formula.

If used as prescribed, Dione Rustlime leaves a protective film which preserves the material and is water-resistant. This reduces the adhesion of lime and dirt and impedes corrosion of chromium-plated fittings. Prolongs cleaning intervals – Time-saving sanitary cleaning.

The maintenance protection formula protects hands from acid. Pleasant handling through use of the protective formula. Contains more than 90%-biodegradable surfactants – well within legal requirements.

Ingredients

Inorganic acids <50, water soluble solvent <5.

Applications

Acid and water-resistant surfaces and objects in sanitary areas made from ceramic, stoneware, porcelain, chrome, stainless steel, anodised aluminium, polyacryl-synthetic material, glass, acrylic glass such as walls and floor tiles, wash basins, fittings, showers, toilet bowls, urinals etc.

Caution: Door handles and toilet seats and lids made from polyamid as well as enamelled tubs and basins or surfaces containing calcium (marble) can be damaged by acid!

Directions

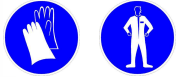

Before first treatment, always test on an inconspicuous spot to see if the material is acid-resistant.

Sanitary surface cleaning: Apply Dione Rustlime pure or diluted (2-3 splashes in 4 litres bucket). Treat the surface. Allow to work in briefly, then rinse off thoroughly with water.

Spray under the rim of toilets and urinals, use toilet brush, then flush.

Mss-Grup accept no responsibility for damage resulting from improper use or application of the product.
