

MSS®-DİONE Sanacid

Acidic Toilet and Washroom Cleaner

Features

Fast-acting acid-based sanitary cleaner, which is not subject to ADR. Dissolves limescale, lime soap, water stone and urine stone. The product has a pleasant, fresh fragrance. Treated surfaces must be rinsed with clear water. In accordance with the cleaning and maintenance recommendations of various manufacturers of sanitary fittings, detergents containing acid should not be used on chromed or synthetic coated fittings. Caution! Should not be applied on acid sensitive surfaces such as some chrome fittings, enamelled surfaces, toilet seats and lids and partition walls made from synthetic material, brass, bronze fittings, anodised aluminium, washing troughs and surfaces made from natural or artificial stone. Contains more than 90% biodegradable surfactants - well within legal requirements.

Ingredients

Nonionic surfactant, inorganic and organic acids < %25, maintenance substances, fragrance and dye.

Applications

Suitable for acid and water-resistant surfaces and objects in sanitary areas such as ceramic wall and floor tiles, fittings, wash-basins, toilet bowls, urinals made from ceramic, porcelain or stainless steel.

Directions

Before first treatment, always test on an inconspicuous spot to see if the material is acid-resistant. Routine cleaning using the wet mopping system (on tiled floors): Dilute 200 ml in 8 litres of cold water. Surface cleaning: Spray the cleaner undiluted on to wash basins, wall tiles, showers etc., distribute with cloth or sponge and rinse off with water. Spray under the rim of toilets and urinals, distribute with toilet brush, leave for a short while, flush.
