

MSS®-DİONE WC

Toilet Cleaner

Features

Viscous and highly acidic power cleaner for thorough cleaning without unpleasant odours. Dione WC sticks to the surfaces and removes even deposits which are not readily soluble, especially under the rims of the WC bowls. Not suitable on acid-sensitive objects such as chromium-plated fittings, enameled surfaces, toilet seats and lids, synthetic material, brass, bronze, anodized aluminium, aluminium, washing basins made from artificial stone and surfaces made from natural or artificial stone. Read the safety instructions when using the product! Contains more than 90%-biodegradable surfactants – well within legal requirements.

Ingredients

Inorganic acid %25, thickener and dye.

Applications

Only suitable for ceramic, porcelain or stainless steel WC bowls and urinals. Removes even deposits out of limestone, urine stone and rust which are not readily soluble.

Directions

Before first treatment, please check on an inconspicuous spot to see if the material is acid-resistant! Spray Dione WC undiluted under the rim of the toilet bowl (interior) and/or on the surfaces to be cleaned and spread it with the toilet brush. Allow to act for a short while, rub off dirt with the toilet brush under running water. The cleaning solution should not get dry. MSS Group accept no responsibility for damage resulting from improper or application of the product.
