

MSS®-HEMERA Otomat AI

Alkaline Cleaner for Scrubber

Features

MSS-Hemera Otomat AI is a multipurpose cleaner suitable for both manual and mechanical application. It has very good reticulation properties, is fast acting and efficient, does not foam and dries streak-free after routine cleaning. Removes general dirt, oil and grease and, depending on the dilution, dirty coatings of maintenance cleaner as well as of wax emulsion polish. Contains more than 90%-biodegradable surfactants - well within legal requirements.

Ingredients

Nonionic surfactant <%10, solubilizer, water soluble solvents, complexing agent <%5, alkali, fragrance.

Applications

Suitable for final construction, intensive and routine cleaning on waterproof-hard floor coverings such as casting resin, epoxy resin, artificial stone bound in resin, hard glazed brick tiles, stoneware, porcelain tiles, concrete, washed concrete, granite and quartz stone. Final construction cleaning and intensive cleaning of waterproof, hard and elastic floor coverings such as magnesite (magnesite-clay floors), square concrete stone, marble, impregnated slate, linoleum, rubber, synthetic rubber, PVC, polyolefin, polyurethan. For intensive cleaning of waterproof, hard and elastic floor coverings, if they have been protected with Ceradur, Trend, Prisma, Profekt concentrate or Procur concentrate.

Not suitable for polymer coated floor coverings.

Directions

Routine cleaning with scrubber drier or by wet mop: Dilute 50 - 80 ml in 8 litres of cold water, depending of the level of dirt.

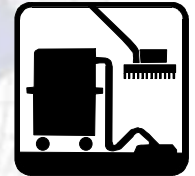

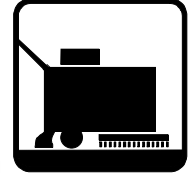

Manual or mechanical intensive cleaning: 100 - 300 ml in 8 litres of cold water. Distribute the cleaning solution, scrub, vacuum, rinse with clear water.

Final construction cleaning with machine and pad: 1 - 2 l in 8 litres of cold water. Same application as described under intensive cleaning.
