

MSS®-HEMERA Otomat N

Neutral Cleaner for Scrubber

Features

Surface active, low-foaming maintenance cleaner for the protective treatment of floor coverings with scrubber driers or scrubbers with cylindrical brushes. The maintenance substances left on the surface dry streak-free and form a solid, glossy and non-slip protective layer. Thanks to the impermeability of the coating and to the resultant high resistance to dirt, heelmarks are only occasionally visible, and can be easily removed. If Hemera Otomat N is used regularly with a scrubber drier, the maintenance substances react in a way that prevent over-maintenance of the floor. Contains more than 90%-biodegradable surfactants - well within legal requirements.

Ingredients

Anionic and nonionic surfactants, water soluble solvents, maintenance substances, fragrances.

Applications

Waterproof floor coverings with sealed, glossy or polished surface such as natural or artificial stone, asphalt, epoxy resin, PVC, polyolefin, rubber, linoleum etc. Suitable for routine cleaning in department stores, covered markets, warehouses, multipurpose sheds and administration buildings.

Directions

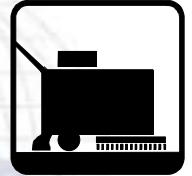

Routine cleaning with scrubber drier or scrubber with cylindrical brushes:
Dilute 100-400 ml in 10 liters of cold water, depending of the level of dirt or desired maintenance effect.

Dry coating can be finish-polished with a high-speed polishing machine (800-1,600 r.p.m.), which optimises the polished effect, dirt resistance and durability.
