

MSS®-HEMERA Tableshine

Synthetic material and desk cleaner

Features

Spray cleaner with an intensive cleaning agent and highly soluble properties. Effortlessly removes dirt which is not easily dissolved on solvent-resistant material. Hemera Tableshine has been especially developed for this application area. For general routine cleaning of surfaces with the spray cleaning method, we recommend Profless concentrate. Hemera Tableshine has a pleasant fresh fragrance and is mild to the skin. Contains more than 90% biodegradable surfactants - well within legal requirements.

Ingredients

Anionic surfactant, nonionic surfactant, water soluble solvent < 25, additive and fragrance.

Applications

Removes pencil and indelible pencil marks, ink, felt pen marks and stubborn remains of sticky labels on solvent-resistant synthetic surfaces and surfaces with a synthetic coating, stainless steel, aluminium, anodised aluminium, etc.

Not suitable for ABS plastic such as special telephone casings, some PC keyboards or LCD displays. Such plastic material is usually marked with "ABS". If such a surface has been sprayed by mistake, wipe off immediately with a cloth. This will prevent the material dissolving.

Caution! Solvent-resistant varnishes (based on water) and coatings will be dissolved by Hemera Tableshine.

Directions

Before first use, check on an inconspicuous spot if the surface is solvent-resistant!

Always spray onto the cloth not onto the surface!

Spray Hemera Tableshine onto the cloth. Rub off the dirt on the surface and rub dry without leaving residues.

In case of dirt which is not easily dissolved, carefully spray Hemera Tableshine on the stain, allow to act for a short while and wipe off with a dry cloth without leaving residues.

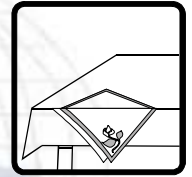

The spray bottle is refillable with the 5 litre container and tap.

MSS Group accept no responsibility for damage resulting from improper use or application of the product.
