

# MSS®-LOTİS Handclean

## Liquid Industrial Hand Cleaner

### Characteristics

Hand Cleaner is a high quality liquid hand cleaning product which has a suitable composition for the skin. It provides quick and confident cleaning for hands contacting with heavy soil and oil permanently. Hand Cleaner can easily solve and remove soils formed by carbon, ink or oil without irritating the skin. It is very economical and it is used with liquid hand washing equipments.

### Composition

Contains soaps, sodium laurel ether, sulphate, TEA, perfume, and preventive substances.

**Physical Characteristics:** Colorless liquid.

### Directions and Dosage

Solid soaps can be a source of contamination in public areas. Hand Cleaner is used for providing hand hygiene with confidence. Hand Cleaner can easily removes every type of heavy soil, and oil without irritating hand and skin health of people working in industrial areas such as; factories, foundries, printing house, automobile services, shipyards, and technical services. It does not irritate the skin even it is used frequently. However it shouldn't be forgotten that delicate skins can be irritated even by water because of decreasing amount of natural fat on the skin. If your skin is delicate, after cleaning your hands with Hand Cleaner apply an appropriate skin care lotion to your hands.

Take 1-2 drops of Hand Cleaner (app. 3ml) from liquid hand washing equipment, rub your hands and rinse with water. In case of excess usage rinsing time increases but that doesn't damage skin. It is recommended to use Hand Cleaner in small quantities, in order to make economy.

### Storage

Store it in a cool and dry place. Do not stack more than two tight-head containers on top of each other.
