MSS®-RİSUS Carp-Ex

Carpet Cleaner for Spray Extraction Machine

Carpet Care

Features
Carp-Extracta contains intensive-action surfactants and polymers which are low-foaming. Dirt is quickly dissolved and removed by the spray-extraction method. The remaining humidity of the cleaning solution forms polymer-agglomerates which can be vacuumed when dry (antisoil-effect). Carp-Extracta acts against mites and unpleasant smells. Contains more than 90%-biodegradable surfactants - well within legal requirements.

Ingredients
Nonionic surfactant <%10, phosphates <%15, water soluble solvents, acrylic dispersion, fragrance.

Applications
Suitable for all colourfast and moisture-resistant textile covers and floor coverings.

Directions
Before application, vacuum carpet thoroughly.
Dilute 0.5-1 litre in 8 litres of water, depending of the level of dirt.
Spray extraction:
Pour solution into the fresh water tank, spray onto stains using the adapter and apply in overlapping paths over the carpet. Extend the clean, but still moist, pile - do not walk on carpet until totally dry. During the next routine cleaning, vacuum or vacuum sweep the dry carpet.
Textile pad method:
Pour solution into a spray can. Lightly spray onto a textile pad, place the pad under a rotary floor machine, spray sparingly onto 1 sq m of the carpet surface and shampoo the carpet in a circular motion. Turn or replace the textile pad.
Kiehl accept no responsibility for damage resulting from improper use or application of the product.
