

MSS®-RISUS Carpfoam

Concentrated Dry Foam Carpet Shampoo

Features

Risus Carpfoam solution has an intensive cleaning effect, whilst being kind to carpet fibres. As it dries, agglomerates of polymers and dirt form which do not adhere to the fibres (antisoil-effect), so can be vacuumed out. Do not use Risus Carpfoam with pre-foamer. If excess foam is formed (for example from residual surfactants in the carpet from previous cleaning), vacuum the foam with a wet vacuum cleaner, or extraction machine using warm water and then vacuum. Contains more than 90%-biodegradable surfactants - well within legal requirements.

Ingredients

Anionic surfactants, polymer dispersions, fragrances.

Applications

Suitable for all colourfast and moisture resistant carpets.

Directions

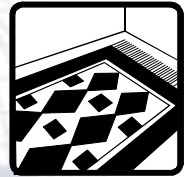

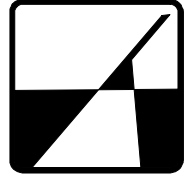

Before application, vacuum carpet thoroughly. Dilute 1-1.5 litres in 8 litres of water, depending of the level of dirt. Pour solution into tank, start the machine on a rubber or PVC mat until foam begins to form. Shampoo the carpet in a radial motion. After application, raise the pile and do not walk on the carpet until it has totally dried out. During the next routine cleaning, vacuum or vacuum sweep the dry carpet.

MSS-Grup accept no responsibility for damage resulting from improper use or application of the product.
