

MSS®-Foam Heavy Duty

Heavy Dirt and Oil Solvent Foamy Alkaline Cleaning Agent

Features

MSS-Foam Heavy Duty is a liquid cleaning agent used in the food industry for cleaning very dirty surfaces thanks to its special formula containing high alkalinity. MSS-Foam Heavy Duty has high oil and protein dissolving and heavy dirt removal properties. It is especially used in cleaning smoke rooms and very dirty places (sausage boiling tanks and frying {roasting} tanks). It does not damage stainless steel, PVC, polyethylene, polypropylene and ceramic surfaces. It is not suitable for galvanized and aluminum surfaces.

Composition: Sodium hydroxide, non-ionic surfactant

Physical Properties: Brown, burgundy colored, liquid form.

Density: 1.35 ± 0.05 gr/cm³ (at 20 °C)

Usage and Amount

MSS-Foam Heavy Duty can be applied in smoke rooms manually with a brush or in the form of foam cleaning with a suitable machine. After the process is completed, the application area should be rinsed thoroughly. If used in boats, MSS-Foam Heavy Duty solution is prepared in the boat after filling it with hot water and waited for a while. If heavy dirt has not passed into the solution, brushing is done. After the boat is emptied, rinsing is done until the dirty solution is removed from the environment. It should be prepared at 70 - 80 °C, 1% - 5% concentration and applied for 15 - 30 minutes according to the dirtiness of the area to be cleaned. MSS-Foam Heavy Duty concentration is calculated by titration method. 50 ml of solution is taken into a conical flask. It is titrated from red to colorless with 0.5 N HCl with phenolphthalein indicator.

% Concentration (MSS-Foam Heavy Duty) = Consumption (ml) x Factor

Storage

Store in a cool and dry environment. Do not stack more than three canisters on top of each other. Shelf life is three years from the Production Date.
