

MSS®-Pack Heavy Alkali PC

High Alkaline Polycarbonate Bottle Washing Agent

Features

Pack Heavy Alkali PC is a liquid product used for washing polycarbonate bottles that do not contain surfactants and contain a certain amount of caustic. Pack Heavy Alkali PC has a very high washing effect on polycarbonate bottles. In addition, since it does not contain surfactants, it does not crack the bottles and extends the life of the bottles. If foaming occurs due to the water used in the washing tank, it is recommended to add a suitable defoamer. In addition, a disinfectant can be added to the disinfection tank to prevent infection in the bottles.

Composition: 50% <alkaline substances, 1<% anionic and nonionic surfactants, phosphonates, organic salt.

Density: 1.3±1 gr/cm³ (at 20 °C)

Physical Properties: Light yellow clear liquid.

Usage and Amount

Pack Heavy Alkali PC should be used with a concentration of 0.5 - 1.5% in the main bottle washing tank and the operating temperature should be 55-65 °C.

Concentration Determination: 10 ml of bath solution is taken into a conical flask and titrated with 0.1 N HCl using phenolphthalein indicator until it becomes pink and colorless.

% Concentration = Consumption (ml) 0.1 N HCl x (0.6)

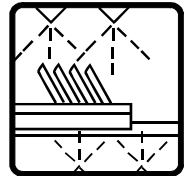

Storage

Storage should be stored in a cool and dry environment and should not be stacked more than two canisters on top of each other. Shelf life is two years from the date of production.

Safety Symbol
