

MSS®-Pack PC

Polycarbonate Bottle Washing Agent

Features

Pack PC is a liquid product used in the washing of polycarbonate bottles, which does not contain caustic and surfactant. Pack PC's washing effect on polycarbonate bottles is quite high. In addition, since it does not contain caustic and surfactant, it does not cause cracking in the bottles and extends the life of the bottles. If foaming occurs due to the water used in the washing tank, it is recommended to add a suitable defoamer. In addition, a disinfectant can be added to the disinfection tank to prevent infection in the bottles.

Density: 1.45±0.05 gr/cm³ (at 20 °C)

Physical Properties: It is in colorless, clear liquid form.

Usage and Amount

Pack PC should be used with a concentration of 0.5 - 1.5% in the main bottle washing tank and the operating temperature should be 55 - 65 °C.

Concentration Determination: 10 ml of bath solution is taken into a conical flask and titrated with 0.1 N HCl using phenolphthalein indicator until it becomes colorless from pink.

% Concentration = Consumption (ml) 0.1 N HCl x (0.6)

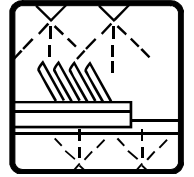

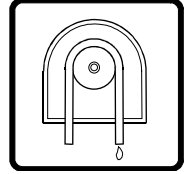

Storage

Store in a cool and dry environment. Do not stack more than three canisters on top of each other. Shelf life is three years from the date of production
