

MSS®-Pack Rust Cleaner

Additive for Rust and Heavy Dirt Removal in Bottles

Food Hygiene

Properties

It is an additive used in the food industry to enhance the cleaning effect of bottle washing.

Advantages: Removes rust rings and limescale deposits from bottles. Prevents limescale formation with regular use. It is an additive used in the food industry to enhance the cleaning effect of bottle washing.

Density: 1.28 - 1.32 g/cm³ (at 20 °C)

Physical Properties: It is a brown liquid.

Usage and Quantity

Pack Rust Cleaner is highly effective in cleaning rust rings, calcium and magnesium, organic and inorganic residues from bottles due to its special complexing agents.

Since Pack Rust Cleaner and liquid caustic soda do not mix as a concentrate, dosing them separately into the cleaning solution will be more beneficial in preventing limescale-causing water hardness.

Usage Rates: In bottle washing machines

Concentration: Pack Rust Cleaner 0.3%-1.0%

Concentration: Pack Rust Cleaner 2.0%-3.0%

Concentration Determination: Take 50 ml of bath solution. Titrate with 0.01 N copper sulfate using phenolphthalein as indicator. Record the consumption in ml based on the color change.

Pack Rust Cleaner = Consumption (ml) x Factor (Factor = 0.04)

Storage

Store in a cool and dry place. Do not stack more than three containers on top of each other. Shelf life is three years from the date of manufacture. Protect from freezing. In its original packaging, sealed, it can be stored at 0–50° C for 1 year.
