

MSS®-MOBİDİK Alg

Liquid Algaecides for Pools

Features

Prevents algae formation in pools, kills microorganisms, and provides clarity to the water. It is a neutral, liquid product that does not contain chlorine. It does not harm metal and other materials (plastic, rubber, ceramic and wood), and has no corrosion effect. It prevents the formation of lime and dirt traces at the water level. It can be used as a disinfectant in foot pools.

Composition: Contains benzalkonium chloride.

Usage and Amount

In empty pools: The solution prepared by diluting it by 5% is used for pre-cleaning the pool walls with a brush.

In periodic use : 50 – 70 gr. / for 10 m³ of water (every 3 days)

In shock use : 100 – 140 gr. / for 10 m³ of water (every 3 days)

Storage

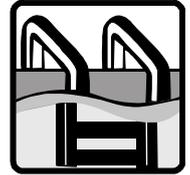

It should be stored in its tightly closed original packaging in a cool and dry environment away from direct sunlight. It should not be stacked more than two cans on top of each other.

Storage life is at least 1 year.
