

MSS® -MOBİDİK Ion

Liquid Hardness Stabilizer for Pools

Features

Reduces the hardness of pool water, adds shine to the water. It is a liquid product. Prevents calcification in pipes, sand filters and water level.

Composition: Contains complexing agents.

Usage Method and Amount

The solution should be prepared at 10% saturation outside, in a plastic container, preferably with hot water. Additional dosage is made by taking into account the amount of daily water loss. The dosage amount varies according to water hardness.

In the first filling : 3000 - 4000 gr. / for 10 m³ of water

In periodic use : 750 - 1000 gr. / for 10 m³ of water

After backwashing : 500 gr. / for 10 m³ of water

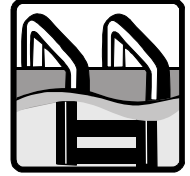

Storage

Storage should be stored in a cool and dry environment, away from direct sunlight, in its tightly closed original packaging. Should not be stacked more than two cans on top of each other. Storage life is at least 1 year.
