

MSS® -MOBİDİK Ph Max L

Liquid pH Increaser for Pools

Features

Increases the pH value of pool water. It is a liquid alkaline product.

Composition: Contains inorganic salt.

Usage and Amount

The appropriate pH level of pool water should be between 7.2 and 7.6. When the pH value drops below 7.2, Flipper pH Increaser should be added. Adjustment of the pH value of the pool should be done before adding disinfectants. The solution should be prepared outside in a plastic container at 10% saturation and added to the water from different points of the pool. The dosage amount varies according to the water hardness.

In soft water: 50 gr. / for 10 m³ water

In hard water: 150 gr. / for 10 m³ water

Storage

Storage should be stored in a cool and dry environment, away from direct sunlight, in its tightly closed original packaging. It should not be stacked more than two canisters on top of each other. Storage life is at least 1 year.
