

# MSS®-MOBİDİK Winter

## Liquid Winter Care Agent for Pools

### Features

Prevents calcification, algae and pollution in pools that are not used during the winter without draining the water. It is a liquid product that does not contain phosphate. It does not harm the pool material. It is extremely easy to prepare the swimming pool for reuse after using the winter maintenance product.

**Composition:** Contains complexing agents and quaternary ammonium compounds.

### Usage and Amount

Used at the end of the summer season. The dosage amount depends on the hardness of the water. It is applied directly to the pool water. In order to provide a good mixture, the circulation and filter systems should be operated for 1-2 days.

**In soft water** : 300 gr. / for 10 m<sup>3</sup> of water

**In hard water** : 400 - 500 gr. / for 10 m<sup>3</sup> of water

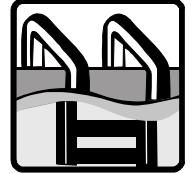

### Storage

Stored in a cool and dry environment, away from direct sunlight, in its tightly closed original packaging. It should not be stacked more than two canisters on top of each other. Storage life is at least 1 year.

### Safety Symbol

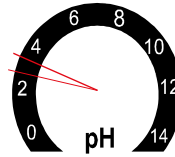

### Havuz Bakımı
