

MSS® -KREON Markwipe

Mark Wiper for Porcelain Plate

Features

After some time metal scratch and marks begin to form on white porcellens. Normal washing and bleaching activities doesn't make any effect on this marks. Kreon Markwipe removes these marks. Some designs and figures are on the out side of enamel layer of the porcellen. Do not apply the product on this type of porcellens. Surface active components of the product are bio-degredable in nature.

Ingredients

Inorganic acids 5–15%, Surface active compounds.

Applications

Apply the product in concentrated form. Fill the product in a plastic or stainless steel washtub. Immerse white porcellen with metal scratch mark into the washtub. Wait for action of the product. (1-2 hours or from night) Take out the porcellens from the washtub. Rinse thoroughly.

Storage

Store in a cool place
