

MSS®-FERONIA Parfüme

Laundry and Air Fresheners

Features

Perfume completely evaporates after a certain temperature and loses its feature. For this reason, the pleasant smell given by the softener may disappear in washed laundry. It gives a pleasant smell to washed and dried laundry, especially towels, bathrobes, blankets, curtains and woolen items. It is used by pulverizing with spray bottles. It should be applied to the laundry to be ironed after ironing. It gives a pleasant smell to the environment if it is pulverized in the air of the room, bathroom or general use areas. It is economical.

Composition: Contains 1–5% perfume, 1–5% nonionic surfactant, 1–5% organic solvents and preservatives.

Physical Properties: Appearance, colorless clear liquid Density, 950±50 g/l

Usage and Amount

It is used with a spray bottle. It should be shaken before use. It is used by pulverizing in the air or directly on the laundry surface according to the purpose of use. We recommend that you use the spring scent as a room perfume and the breeze scent as a laundry perfume. However, if there is a need to use both in the environment, we recommend that you decide on a single scent and use it. Avoid contact with eyes during use.

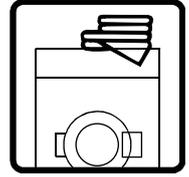

Storage

Storage should be in a cool and dry environment. Do not stack more than two cans on top of each other.
