| Motor Speed | 1450RPM |
| Hose / Length | 10M |
| Filter | With |
| Foam Canon | With |
| Gun / Lance | Gun with trigger 85cm lance |
| Nozzle Tips | 0.40 |
| Net Weight | 75 Kg |
| Product Size | 700*450*960mm |
| Box Size | 805*480*705mm |

The pump filter protects the pump motor and other internal components from damage caused by dirt, sand, or other particles. This helps the pump last longer and reduces the likelihood of malfunctions.

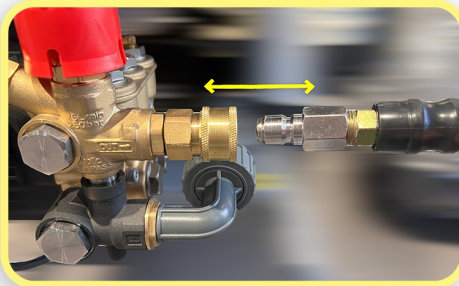

Facilitating easy assembly enhances user experience, ensuring the secure and efficient transmission of high-pressure water through accurate connections.

Manual and auto switch provides ease of use.

Foam gun easily attachable to the trigger allow users to utilize cleaning products according to their needs, providing the advantage of customizing the cleaning of various surfaces and types of dirt in a more personalized manner.

This design feature speeds up the processes and provides ease of use.

The hose is 10 meters long and durable.
The water filter prevents dirty particles from the water source.
